

KPMG Global Tech Innovator competition 2024

The first KPMG Global Tech Innovator in Estonia recognizes the fastest-growing, most innovative companies across the country. We support businesses with an ambition to accelerate their next phase of growth.

Wherever you are in your business lifecycle — from early-stage growth to getting ready to accelerate your expansion — our aim is to help you achieve your ambition and take your business to the next level.

There's a lot in it for you

1. National & global exposure: pitch your innovations and present your growth ambitions. Winning companies will be featured in KPMG's "Winners Report" and local media profiles. They will also receive global attention among key influencers at **Web Summit 2024, Lisbon**, in November.

2. Recognition: profile your business throughout the competition, leveraging KPMG channels and local media.

3. Networking: connect with like-minded peers, key industry experts and influencers both locally and globally through the competition.

4. Go global: Winner will automatically progress to the Global Tech Innovator final, to be hosted in Lisbon, in November with international mentors. Global finalists will also become an alumnus of a growing Global Tech Innovator fellows network for high-achieving entrepreneurs to share ideas and challenges and build important connections.

Who can apply?

Companies that have **innovative, proven technologies, robust business models, the ability to demonstrate traction and the potential to scale up globally** are encouraged to apply.

[Apply now!](#)

Applicants must be either purely technology focused, or tech-enabled, tech-led or techdriven.
